-

Work Experience

April 2025 - Present | UI UX Designer | CosmicIT Infomatics | Agra, Uttar Pradesh

- Working on revamping the product icons using current design system guidelines.
- Working in close collaboration with cross-functional teams, including developers, product managers, ensuring seamless execution of design projects.
- Remained informed of the latest design trends, industry best practices, and AI plugins, applying this knowledge to elevate the quality and innovation of design work.

September 2024 - April 2025 | UI UX Designer | TechEunoia International | Agra, Uttar Pradesh

- Led the creation and implementation of products with a deep understanding of Usability Heuristics, contributing to enhanced user experiences.
- Worked in close collaboration with cross-functional teams, including developers, product managers, and marketing teams, ensuring seamless execution of design projects.
- Crafted impactful wireframes, prototypes, and mockups, effectively visualizing design concepts and ensuring alignment with project goals.
- Conducted mock user research, gathering valuable insights to drive informed decision-making throughout the design process.
- Facilitated iterative design improvements based on User Acceptance Testing (UAT) feedback, ensuring continuous enhancement of design quality.

April 2022 - June 2024 | Software Developer | AiThinkers | Hyderabad, Telangana

- **React/Solid & TypeScript:** Led the development of high-performance, scalable user interfaces using React.js and Solid.js, significantly enhancing code quality with TypeScript.
- **Tailwind CSS UI:** Drove rapid feature delivery by implementing responsive, modern UIs using Tailwind CSS, accelerating design-to-production cycles.
- **AWS & NGINX:** Contributed to DevOps strategy, utilizing AWS (S3/CloudFront) for hosting and configuring NGINX for optimized content delivery and load balancing.
- **Full Stack Integration:** Integrated complex front-end components with back-end services, leveraging core knowledge of Node.js for utility scripting and API interaction.
- **Performance & Reliability:** Focused on application performance tuning and implemented robust unit/integration testing, improving application stability and user experience metrics.

December 2020 - January 2022 | Graphic Web Designer | Yugox Software | Agra, Uttar Pradesh

- Developed robust, custom web solutions and intricate modules using PHP and the CodeIgniter MVC framework for back-end application logic.
- Architected and maintained scalable WordPress sites, including custom theme and plugin development to meet specific client requirements.
- Expertly translated high-fidelity designs from Photoshop and Illustrator into pixel-perfect, responsive HTML/CSS front-ends.
- Integrated platforms with vTiger CRM via APIs for automated data synchronization, lead management, and custom reporting capabilities.
